

Hello Parents/Caregivers!

Today, your child participated in 'Cultivate Your Neighbourhood' (CYN) a program that encourages children to get active, to understand where their food comes from, and aims to link participating school-children **and** their families (that means you!!) to their closest Community Garden! As part of this project, your school's nearest Community Garden has donated space for your children's plants!

Each student planted several seeds, and they will be nurturing their seedlings in-class until it is time to plant outside at the garden. We will have a **planting day** mid-June that **we hope you will attend!** We will notify you of the specific date as the day gets closer. Throughout the summer we hope your children and/or whole family will visit and help maintain this small space of garden with the rest of our community and share in the harvest!

Your Community Garden is located at:

Name: _____

Location: _____
